

## How to make a Line Graph in Microsoft Excel 2007

1. Enter the data in the worksheet.
2. Make sure not to leave blank rows or columns when entering the data.

3. Once the data has been entered: Drag select with the mouse to highlight all the cells, which contain the data to be included in the graph.

	A	B	C
1	Average Precipitation (mm)		
2		Acapulco	Amsterdam
3	January	10	69
4	April	5	53
5	July	208	76
6	October	145	74

\*\*\*\*\*Looking at the above diagram\*\*\*\*\*

1. Click on the *Insert* tab.
2. Click on the chart category to open the drop down list of available graph types (placing the mouse pointer over a graph type will bring the description of the graph). Preferably use *Line with Markers*.
3. Click on a graph to select it.

4. Now you are ready to format your line graph:  
\* When you click on a graph, three tabs- the Design, Layout, and Format tabs are added to the ribbon under the title on *Chart Tools*.

Adding a Title:

- A. Click on the *Layout* tab.
- B. Click on *Chart Title* under the *Labels* section.
- C. Select the third option- *Above Chart*.
- D. Type in the title: **“Average Precipitation (mm)”**

5. Now you should have your line graph:
