Forward

The University of Texas at Arlington is committed to providing its employees, students, and visitors with a safe environment in which to learn and work. Safety is the responsibility of everyone in our campus community and can be achieved through proper engineering, education, training, protective equipment, and compliance with our safety rules. Each student and employee is responsible for understanding and practicing appropriate safety procedures for his or her own protection and for the safety of others.

The campus community must take an active role in the University's safety program by initiating preventive measures to control hazards associated with activities under their direction. To assist in achieving this end, the Environmental Health & Safety Office has developed this Campus Safety Plan.

A positive safety attitude, knowledge of safety procedures, and appropriate actions will ensure the success of our safety program.

Thank you for helping us provide a safe learning environment.

Vistasp M. Karbhari
President
The University of Texas at Arlington
