Site-Specific Training Record
Hazard Communication Program
The University of Texas at Arlington

Laboratory Version

The University requires documentation that all laboratory employees who use or handle chemicals are trained in accordance with the Hazard Communication Act. This requires the completion of both General Hazard Communication training and Site-Specific training, and if applicable, Basic Radiation and Laser Safety. The Lab Supervisor or Principal Investigator (PI) is responsible for ensuring that Site-Specific training is provided to new employees and whenever the potential for exposure to hazardous chemicals increases significantly or when new or significant hazard information is received. In compliance with UT Arlington’s Laboratory Safety Manual, Hazard Communication Program and the Texas Hazard Communication Act, the individuals listed below have attended a training session covering the provisions on the next page of this document.
