NEW

State-of-the-Art Pipeline Methods & Technologies Journal of Pipeline Systems Engineering and Practice

What Does the Journal Offer

The *Journal of Pipeline Systems Engineering and Practice* reports on a broad range of topics including the • planning • engineering • design • construction • renewal • safety • operation and maintenance • asset management • environmental aspects and • sustainability of pipeline systems. An important technical reference for researchers and practitioners from academia, industry, and government, it presents in-depth information on water distribution and transmission systems; wastewater collection systems (gravity and force mains); storm sewers and drainage structures/culverts; oil, gas, industrial, slurry, pneumatic and capsule pipelines; as well as conduit applications for power and communication cables.

Aims & Scope

- Current and emerging technologies
- Investigation innovations and condition and structural assessment
- Pipeline stress analysis and mechanical design
- Pipe materials (composites, hybrids, and "smart" pipes)
- Appurtenances and joining systems
- Internal and external corrosion protection (linings, coatings, and cathodic protection)
- Pipeline hydraulics, modeling, and pumping
- Developments in codes, specifications, and standards
- Hazard identification, as well as hazard location, security, and safety
- In line, remote, and automated condition assessments
- Performance, deterioration, life-cycle-cost analysis, and optimization techniques
- Geotechnical, pipe-soil-structure interaction, and seismic issues
- Risk assessment and management
- Budgeting and funding issues
- Forensic investigations and GIS applications
- Renewal and replacement/installation techniques

Forthcoming Technical Papers About the Editor

Long Range Facility Planning Based on Dynamic Programming for Optimum Combined Cost and Probability Paths
—KAMAL K. BOTROS, W. J. TCHIR, J.F. HENDERSON, & B. CHMILAR

A Hierarchical Fuzzy Expert System for Risk of Failure of Water Mains
—DR. TAREK ZAYED & HUSSAM FARES

Ranking of the Factors Affecting Productivity of Microtunneling Projects
—DR. MOHAMED HEGAB & DR. OSSAMA M. SALEM

Recommendations for Design of Reinforced Concrete Pipe
—DR. ECE ERDOGMUS & BRIAN N. SKOURUP

Ring-Reinforced Pipelines: That Moment of Mystery
—DR. W. DAVID CARRIER, III

Reliability Analysis of Buried Flexible Pipe-Soil Systems
—G. L. SIVAKUMAR BABU & AMIT SRIVASTAVA

Dr. Mohammad Najafi, P.E., the founder and Editor-in-Chief of this *Journal*, is currently the coordinator of the Construction Engineering and Construction Management Area and Director of the Center for Underground Infrastructure Research and Education (CUIRE) at the Department of Civil Engineering at The University of Texas at Arlington. He has more than 28 years of experience of being a project manager and engineer, researcher, and consultant at numerous multi-million projects, research, and consulting assignments. Dr. Najafi is also a productive writer, who authored several books such as "*Trenchless Technology: Pipeline and Utility Design, Construction and Renewal*" and published more than 100 papers and several manuals about trenchless technology.

How To Contribute—Online Submission at jrnpseeng.edmgr.com

ASCE encourages the submission of scholarly and practice-oriented articles to the *Journal of Pipeline Systems Engineering and Practice*. Please review the scope statements at the journal's home page (pubs.asce.org/journals/pipelines). The Journal accepts submissions online at jrnpseeng.edmgr.com. Papers under review, accepted for publication, or published elsewhere should not be submitted and will not be considered.

Online Access at www.ASCELibrary.org

View abstracts and tables of contents for free online at www.ascelibrary.org. Immediate access to full-text articles is available to paid subscribers. The *Journal of Pipeline Systems Engineering and Practice* and 31 other ASCE journals are included in the ASCE Online Research Library at www.ascelibrary.org along with 257 ASCE conference proceedings. The Research Library contains more than 72,000 technical and professional articles, more than 623,000 pages of civil engineering content.

HOW TO ACCESS ONLINE JOURNALS—Register at pubs.asce.org

INDIVIDUALS will access via a username and password. INSTITUTIONS will access via registered IP addresses. Both must register online at pubs.asce.org. Prepayment of subscription(s) is required for online access to begin.

Subscriptions are entered on a calendar-year basis. Back issues will be sent for any issues already published during the subscription year. Journal issues will be shipped upon receipt of payment. Domestic rates apply only to the United States and its possessions. International rates apply to all other countries. For journals being shipped to international destinations, air delivery is included in the international rate price.
