

Publications, Dr. Mostafa Ghandehari

The reflection property in normal linear planes with applications to generalized conics, Technical Report #351, Mathematics Department, University of Texas at Arlington, July 2005, co-author Edward J. O'Neill

Examples from elements of theory of computation, Proceedings of Gulf-Southwest 2003 conference held at the University of Texas at Arlington

A quadratic matrix equation, Dept. of Mathematics, University of Texas at Arlington, 2002, co-authors Merlynd Nestell and Srinath Sridhar

A Quadratic Fredholm Integral Equation and its Solution for Various Kernels, *Libertas Mathematica*, Vol. XXII(2002), 41-48

Tennis, Geometric Progression, Probability and Basketball, *Math. Gazette*, Nov. 2002

A geometric inequality for convex polygons, Dept. of Mathematics, University of Texas at Arlington, 2001

Minkowski's inequality for convex curves, Dept. of Mathematics, University of Texas at Arlington, 2001

Total curvature in Minkowski planes. Dedicated to Emeritus Professor Corneliu Constantinescu on the occasion of his 70th birthday. *Libertas Math.* 20 (2000), 107-112.

Controlling curvature in Minkowski planes. *J. Math Anal. Appl* 252 (2000), No. 2, 951-958.

Minimum path problems in normed linear spaces, reflection and refraction, to appear, *J. of Optimization Theory and Applications*.

A quadratic Volterra integral equation and its solution for various kernels, to appear in *Volterra Equations and Applications*, Volterra Centennial Symposium, co-author M. K. Nestell, Gordon and Breach Science Publishers.

Ray Optics on Surfaces, *Libertas Mathematica*, Vol. 18, 1998.

Self-circumference of rotors, *Acta Mathematica Hungarica*, Vol. 79 (3), 1998, 1993-204.

On a separable nonlinear Volterra integral equation with power nonlinearity, *Libertas Mathematica*, co-author M. K. Nestell, Vol. 17, 1997, 175-181.

Polar duals of rotors, *Acta Mathematica Sinica*, new series, 1996, Vol. 12, No. 1, pp40-42.

An optimal control formulation of the Blaschke-Lebesgue Theorem, *Journal of Mathematical Analysis and Applications*, 200, 322-331, 1996.

Polygonal Circles, *Mathematics and Computer Education Journal*, co author R. Pfeifer, Spring, 1995, vol. 29, No.2, pp 203 210.

Sums of distances in normed spaces, *Acta Mathematica Hungarica*, vol 67(1), 1995, pp 123 129.

How the elliptic integrals K and E arise from circles and points in the Minkowski plane, *Journal of Geometry*, co author Dave Logothetti, vol 50 (1994), pp 63 72.

Steinhardt's inequality in the Minkowski plane, *Bull. Austral. Math. Soc.*, vol. 145, no. 2, April 1992.

Polar duals of convex bodies, *Proc. Amer. Math. Soc.*, vol. 3, Nov., 1991, pp 799 808

An algorithm for the construction of group codes, *Mathematics and Computer Education Journal*, 25 3, 1991, pp 260 268, co author C. Sue Brown.

The Fermat problem in Minkowski spaces, *Geometriae Dedicata*, 17, 1985, pp 227 238, co author G.D. Chakerian.

The sum of distances determined by points on a sphere, *Discrete Geometry and Convexity*, *Annals of the New York Academy of Sciences*, 440, 1985, pp 88 91, co author G.D. Chakerian.

An inequality for a sum of distances, *Congressus Numerantium*, 50, 1985, pp 31 35, (Proceedings of the Combinatoria Conference held at Sundance, Utah), co author A.D. Andrew.
