The University of Texas Arlington College of Nursing & Health Innovation
Simulation Education at the Smart Hospital Facilities

CONFIDENTIALITY AGREEMENT
As a student nurse participating in simulation learning activities, I understand the significance of maintaining confidentiality and adhering to provisions of the current University of Texas Arlington College of Nursing & Health Innovation (UTA CONHI) Academic Programs-Student Handbook and the Nursing Students: Code of Ethics. Outside of simulation sessions, I agree not to share information concerning simulated patients, scenarios, key learning points, student roles, student performance, and/or any comments during simulation and debriefing sessions. I agree to report any violations of confidentiality that I become aware of to my instructor or a Smart Hospital Facilities (SHF) staff.

SIMULATION LEARNER AGREEMENT
I agree to adhere to the following guidelines:

• All human patient simulators, manikins, and standardized patients (regardless of any associated scenarios and outcomes) are to be treated in a professional manner similar to the care and respect afforded actual patients.
• The faculty members and other students participating in simulation and debriefing sessions as well as staff members of the SHF are to be provided respect, attention, and cooperation.
• Uniforms and Student IDs (in accordance with UTA CONHI Dress Code) are required.
• Simulated patients, standardized patients, and patient-care/hospital environments have certain limitations that prevent exact replications of real life experiences. To promote learning, negative actions and derogatory remarks related to gaps that may occur between simulated and actual occurrences are to be avoided.
• Simulators and manikins require careful handling to prevent damage to simulated structures. Hands must be clean when touching the manikins. No betadine or ink pens are to be used in the SHF.
• Use of all equipment including, but not limited to: simulators/manikins, task trainers, computers (SimPads, Tablets, Laptops, VitalSim units, monitors), beds, furniture, IV pumps, feeding pumps, stretchers, flow meters, suction machines, ventilators, and defibrillators must be in accordance with each manufacturer’s “Directions for Use.”
• Any supplies or equipment such as stethoscopes, penlights, etc., used during a simulation class or skills practice must be returned when the session is completed.
• Eating or drinking of any kind is not allowed (unless part of the scenario) in the SHF lab areas. Lunch / Break facilities are not provided.
• Cell phone use is limited to when directed by an instructor to access clinical information. No cell phone / tablet videos or photography allowed during training.
• Daily Locker Rentals available at the Smart Lab. Any lockers left locked will be cut by the end of the day.

VIDEO / AUDIO RECORDINGS RELEASE
I understand that as a participant in SHF activities, my image and/or voice will usually be digitally recorded and that I may be photographed at any time. I agree that the University of Texas Arlington, College of Nursing & Health Innovation, the SHF make use of such recordings or photographs as deemed appropriate for education and educational research purposes only. However, generally recordings of simulation activities are deleted following the completion of the activity or by the end of each semester.
