Repeating Hepatitis B Series Waiver
Used to Waive the Hepatitis B Titer Requirement for 8 Months

I understand that a quantitative lab report showing immunity for Hepatitis B is a requirement at UTACON and that this waiver only exempts me from this requirement while I am repeating the Hepatitis B vaccination series (waiver lasts 8 months).

The vaccination series is as follows and I must keep up to date with this vaccination series:

Hepatitis B Series Timeline
1st dose
2nd dose 1 month after 1st dose
3rd dose 5 months after 2nd dose
New Titer 1-2 months after 3rd dose

I am required to upload documentation of the repeated Hepatitis B series into immunization portal.

If I have received the vaccination series twice and both times show no immunity via a lab report, then I need to submit the Hepatitis B Non-Responder form.

Failure to be compliant with the repeated series and UTACON immunization requirements may result in a hold on my account blocking future enrollment at UTACON.

Please read the following information carefully:
I understand that avoiding exposure to blood is the primary way to prevent transmission of blood-borne diseases such as Hepatitis B. Methods to minimize risk of such exposure comprise proper use of personal protective equipment (PPE), observance of aseptic technique, use of sterile, single-use, disposable needle and syringes, prompt and proper disposal of sharps via sharps containers, etc.

I understand that if exposed to blood or body fluid that is positive for hepatitis B surface antigen, or to blood or body fluids from a person whose HBsAg status is unknown (via needle stick, for example), that I should immediately seek medical care so that I may be treated with hepatitis B immune globulin (HBIG) post-exposure prophylaxis in order to minimize risk of disease.

Upload this form to the immunization portal along with documentation of your 1st vaccination of Hepatitis B.
