The UT Arlington Colleges of Education and Science invite you to join local science teachers, coordinators, and district administrators to explore the issues that teachers, students and parents are facing in regard to teaching and understanding evolution with

**Professor Brian Alters**  
*Tomlinson Chair in Science Education*  
*Director, Evolution Education Research Center*  
*McGill University, Montreal, Canada*  
“Teaching Evolution in the K-12 Science Classroom”

April 23, 2008  
6:30 – 8:00 p.m.  
Nedderman Hall, Room 100  
UT Arlington campus

Call 817-272-3491 for additional lecture information. Parking information on-line at  
http://www.uta.edu/cos/NHparking/

A renowned expert in the teaching of evolution, Professor Alters served as an expert witness during the 2005 Kitzmiller v. Dover Area School District case. His presentation will focus on the creationism versus evolution educational controversy, the present context for teaching evolution, and common misconceptions.
