

# digital Pedagogies Workshops Fall 2008

Sponsored by Classroom  
Technology Support Services

## Web 2.0 Pedagogies

### Creating a Space for Conversation

Learn how to use participatory or user-generated strategies in your classroom and research. Get hip on:

- blogs: online web journals
- wikis: collaboratively created, user-generated resources
- podcasting: the syndication of ideas via digital channels
- tagging: libraries 2.0 or collaborative classification and online communities

Sept 18th - 3:00-4:30 pm - Preston Hall 310

## Imaging Software

### Practical Approaches to Visual Culture

How might you use images to transform your classroom discussions, conference presentations, and job talks? Learn the basics about finding, scanning, editing, and saving images for use in articles, presentations and teaching.

Sept 26th - 3:00-4:30 pm - Preston Hall 310

## Death By PowerPoint

### (and how to avoid it)

This workshop will explore the best and worst practices of PowerPoint and demonstrate ways to make it a useful pedagogical resource for mind-mapping, information chunking and storyboarding the visual presentation of ideas.

Oct 16th - 3:00 - 4:30 pm - Preston Hall 310

## Moving Teaching Online

### Screencasting

You can capture anything that appears on your screen in a video format. Have teaching modules that you use again and again? Frequently asked questions that need to be answered? Do you demonstrate material onscreen for your classes? Use film clips? Need to archive a conversation with a virtual visiting speaker? If so, then screencasting is for you. This workshop will demonstrate how to use Snapz Pro X for Mac and CamStudio for Windows to create videos to upload to the Web or burn to a CD or DVD.

Nov 20th - 3:00 - 4:30 pm - Preston Hall 310
