

MyMav

MyMav is a web-based system that students use to register, check grades, pay tuition, and in fact manage almost every aspect of their academic lives here at UTA.

If you need assistance with a task in MyMav, you can access our on-line training materials at www.uta.edu/mymav by clicking the **Training Documentation for UT Arlington's Students** link. Then, follow the instructions on the training website to view simulations of different tasks in MyMav.

Who We Are

The Office of Information Technology is committed to promoting and powering the productivity of the UT Arlington community through the effective use of information technology.

You may not always see us, but we are the people that answer the phones at the Help Desk, provide computer training, on-site pc repair, as well as maintain and support many other IT Services offered at UTA.

Visit our website today to learn more about OIT services and how they can benefit you.
