

Exciting New Opportunity for Ph.D. Bound Students

Starting in the Fall 2008 semester, the Department of Physics is offering an exciting new opportunity for graduate students to proceed directly toward a Ph.D. after having received a bachelor's degree. This B.S.-Ph. D. program is designed to put students on the fast track for success!

Admission Criteria

For unconditional admission to the Doctoral Track (B.S.-Ph.D.) program in physics, the candidate must satisfy the general admission requirements of the Graduate School, including a minimum undergraduate GPA of 3.0 on a 4.0 scale, as calculated by the Graduate School. In addition, the applicant must be able to provide favorable letters of recommendation from individuals able to assess the applicant's potential for future success in the Ph.D. program. Furthermore, the candidate should have satisfactorily completed at least 24 hours of undergraduate study in advanced physics and supporting courses. The applicant should also have minimal GRE scores of 350 in Verbal and 650 in Quantitative.

Compensation

If accepted to the program, the student will receive a first-year compensation of \$1580 per month less appropriate deductions. The program will also allow the student to apply for the STEM Graduate Tuition and Fee Waiver Fellowship program. After likely approval, the student's tuition and fee costs will be significantly reduced.
