Graduate Students

A selective group of qualified new Physics Ph.D. or Physics Bound Ph.D. candidates will receive a teaching or research assistantships with a stipend of $18,000 for nine months (Fall and Spring semester) these students will have 85% of their tuition covered. Additional funding through a research or teaching assistantship may be available in the summer for qualified students. Students may receive support in later years through graduate research assistantships (and in some cases graduate teaching assistantships), carrying similar stipends.

**Eligibility requirements:** In addition to satisfying the general admission requirements of the Graduate School at the University of Texas at Arlington, the applicant must be able to be admitted unconditionally in either the Physics Ph.D. or Physics Bound Ph.D. graduate program. Strong preference will be given to students who have graduated from internationally recognized high quality universities with a minimum GPA of 3.25 on a 4.0 scale from previous studies, as calculated by the Graduate School and who can be admitted directly into the Physics Ph.D. program. Exceptionally strong letters of recommendation from individuals who are able to assess the applicant’s potential for success in the Doctor of Philosophy program are also required. In addition, the candidate should have a minimal of 155 (700 on the old scale) in GRE Quantitative with an expected minimum total score of 301 (1100 on the old scale). For students graduating from foreign universities, a minimum passing score (79) in TOEFL is also required.
