Functioning somewhat independently, the Postdoctoral Researcher will design, organize and conduct specialized and advanced analysis of qualitative and quantitative data in support of multiple projects focusing on community-based service systems and interventions for children and families. The chosen candidate will work 80% on projects for the Principal Investigators and 20% time on their own projects.

**Job Duties:** Job duties will vary depending on the needs of the project. Tasks will include, but are not limited to, the following:

- Assistance in scoping review projects focusing on mental health policy, mental organizations, and mental health services systems. A second scoping review project will focus on colorism in public education. Activities will include collection, organization, and analysis of research resources in collaboration with research team.
- Assistance in organization, cleaning, and descriptive and multi-level regression analysis of multiple secondary data sets. Write and prepare grants.
- Assistance in design and proposal of difference-in-difference comparative policy analysis, focusing on Medicaid mental health policy.
- Assistance in primary data collection through surveys and focus groups of pre-service education and social work students for cultural competence study. In addition, assistance in qualitative analysis of the data collected.
- Assistance in drafting and submitting research reports and articles resulting from research efforts.

**Position Details and Eligibility Requirements:** One position is available. For consideration for the position, please submit cover letter, CV, writing sample, and contact information for three professional references.

To be eligible, applicants must have:

- 0 – 2 years of relevant experience in a research environment.

Preferred Qualifications:

- Experience and interest in social work or school or community-based intervention with children and families and mental health policy.
- Experience with a range of qualitative and quantitative methods, tools and data sources is important.

**Compensation:** The current position is for 12 months. Salary is competitive with full benefits.

**To Apply:** Complete the online [Post-Doctoral Fellowship Application](mailto:post-doctoral-fellowship-application). You will be contacted via e-mail if you are selected for an interview. Application review will begin immediately and will continue until the position is filled. September 2019 is the preferred start date. NOTE: Be sure to select Dr. Graaf and Dr. Crutchfield on your application to indicate your interest in this position.
