9. The Hidden World of Microbiology. Explore the mysteries of very tiny living things. Use microscopes to look at slides of common household items such as dust, hair, bugs; prepare and view slides of microorganisms from your mouth. Jennifer Siemantel, Professor of Biology, Cedar Valley College.

10. Body Parts. For medical or forensic interests, learn more about your specialized organs; examine sheep eye balls, hearts, and brains. Threadanuj (Jik) Unghusri, Professor of Anatomy, Cedar Valley College.

11. Rock ‘N Roll. Discover what the Earth is made of and how it shakes, rattles, and rolls. Become a field geologist as you learn how to identify minerals and rocks as well as the history of the ground beneath you. Christina Reeves-Shull, Coordinator of Physics, Astronomy, Geology, Cedar Valley College.

ADULT PROGRAM. Adults all attend the same program, but we require your advance registration so we can have copies of conference materials for you. 

Discussion Facilitator: Pat Gregory, M.A., AAUW.
- Perceptions of Race: Presenting President Obama, April Fehler, Ph.D., Professor of Sociology, University of North Texas, Dallas Campus

Expanding Your Horizons

Why should you come?
Girls: This is a fun way to learn about careers in a variety of fields from women who are working in those fields. Attend 3 hands-on workshops and learn about some of the things these women do on the job. Sample a field that interests you already or try one that you know nothing about. No grades, just an opportunity to try something different.
Adults: Attend a program of interesting talks about issues related to life & education for girls.

The EYH Network is the national coordinator for approximately 100 Expanding Your Horizons conferences held each year. Their Sponsors and other information are listed on their web site at www.EYHnet.org
