The Anderson Sport Performance Lecture

Overview:

The curriculum of the Department of Kinesiology includes the study and practice of sport. It is clearly understood that sport is a significant element of our culture and that it is conducted in a variety of settings and for a variety of purposes. Therefore, this lecture is established to provide all interested individuals an opportunity to broaden their understanding of this culture phenomenon.

Purposes:

1. This activity is designed to supplement the department’s educational mission through presentations and interactions with significant professionals from various areas of the sport culture.
2. This activity is designed to recognize significant professionals from the area who are making contributions to our sport culture and can provide different perspectives relative to sport performance.
3. This activity is designed to develop more interaction with sport enterprise outside the department and the university.

Previous Anderson Sport Performance Lectures:

1st Fall 1996 Mr. Mark Holtz, B.A., Texas Rangers Major League Baseball Club Television Play by Play Announcer, Arlington, TX, “The Media Perspective in Sport”

24th Spring 2008 Dr. Dale P. Mood, Ph.D., Professor, Department of Integrative Physiology, University of Colorado. “The Science of Learning Sport Science”

25th Fall 2008 Mr. Trey Hillman, B.A., Manager, Kansas City Royals Baseball Club, Bachelor of Arts in Kinesiology, 1991, The University of Texas at Arlington, “Leadership Journey through Baseball”
DR. EUGENE W. ANDERSON (1932-1997)

Dr. Eugene W. Anderson was Professor and Chair of the Department of Exercise, Sport and Health Studies at The University of Texas at Arlington from 1978-1994. At the time of his death, Dr. Anderson was in the cherished position of a modified service-retired Professor (50% employment) in his 19th year in our Exercise, Sport and Health Studies department. His professional career of over 40 years included service as an assistant vice-president for academic affairs, university department chair, college coach, high school instructor and high school coach.

Eugene W. Anderson received his Bachelor of Science in Physical Education in 1954 and the Master of Science in 1959 from Fort Hays State University in Kansas. He received the Doctorate in Education in Physical Education from Arizona State University in Tempe, Arizona in 1970.

Dr. Anderson's Sport Performance career began with the Kinsley, Kansas Coyotes where he participated in four years each of football, basketball and track. He continued in the athletic world at Fort Hays State University by participating in football (one year), basketball and track where he finished fourth in the high jump at the NAIA National Meet. After serving two years in the United States Army in Fort Bliss, Texas, Dr. Anderson taught history, health, drivers' education, boys and girls physical education and coached the Wildcats in Hanover, Kansas. He then was a high school instructor of history and coached football, basketball and track for two years in Hays, Kansas. Upon the completion of his Masters' Degree, he was employed at Olivet College in Olivet, Michigan from 1960-64 as an assistant professor of physical education and assistant football coach, head basketball coach and golf coach. He then became an assistant professor of physical education and basketball coach at Chico State College in Chico, California (1964-68). In 1968, Dr. Anderson became Chair of the Physical Education Program and subsequently in 1972, Professor and Chair of the Division of Health, Physical Education and Athletics at Southwest State University in Marshall, Minnesota. In 1977-78, he was the Assistant Vice President for Academic Affairs at the same institution.

Dr. Anderson was very prominent in the development of our current Exercise, Sport and Health Studies academic program. During his tenure at UTA, the Health Education and Dance minors were developed. The Bachelor of Science in Exercise Science degree was started for students in the Allied Health Sciences. The physical education-athletic coaching degrees, along with certification for teaching K-12 were shaped and refined. Dr. Anderson's expertise and appreciation for science in sport and performance created the popular Biophysical Principles of Human Movement class (now KINE 1400 Introduction to Exercise Science--there are currently two lecture and seven laboratory sections per semester). His understanding of the acquisition of motor skills dramatically influenced the pedagogy curriculum. His experiences in sport and coaching directly impacted the departmental performance curriculum. Perhaps Dr. Anderson's most intense interest, in addition to curriculum, was in how the curriculum affected facility development. In the 1981-85 academic years, he gave numerous hours to the planning of an educational facility for our Department of Kinesiology academic unit. The facilities' blueprint included numerous laboratories, classrooms, learning centers, student, faculty and activity areas that would have provided an educational setting that would be comparable to the academic program he helped create. The facilities' plans continue to be a model for our departmental future.
Julie Bell, Ph.D.

Julie Bell, PhD is the founder and President of The Mind of a Champion, a coaching firm in Dallas, TX. The Mind of a Champion (MOC) is focused on working with organizations that seek to improve their Performance Intelligence. Dr. Julie Bell received her Bachelor's degree in Psychology from Oklahoma State University and a Master's and Doctorate of Sport Psychology from the University of Virginia where she studied under Dr. Bob Rotella. Dr. Bell and the MOC team have worked with teams and individuals across the country to improve personal performance and make an impact on the entire organization.

Dr. Julie focuses on taking the core principles of sport psychology and transferring them to the athletic playing field as well as the corporate playing field. Her proprietary methodology of training Performance Intelligence reaches audiences at all levels of the team. At its core, Performance Intelligence is an indicator of how well you can perform when it counts. Her book, Performance Intelligence at Work: The 5 Essentials to Achieve the Mind of a Champion was released by McGraw Hill summer of 2009.

Performance Intelligence is comprised of five attributes: Confidence, Focus, Self-Discipline, Competitiveness and a Winning Game Plan. The aptitude and intersection of these five attributes is your Performance Intelligence – your ability to performance your best when it counts regardless of the circumstances.

The impact of her keynote presentations often lead to opportunities to dig deeper into the health of the organization relative to Performance Intelligence. Be it through Bootcamps, Advances or on-line Performance Training Centers, Dr Julie is able to reinforce the concepts of Performance Intelligence as integrated into the ethos of the organization.

Dr. Julie Bell lives in Dallas, TX with her husband and three children.

Please welcome Dr. Bell today as our 28th Anderson Sport Performance Lecturer. There will be a time of question and answers at the end the presentation.
