SmartCare, a technology development center will develop, build, and deploy the next generation of intelligent care technologies enabling a significant nationwide improvement in in-home health care. SmartCare technologies will be non-intrusive, easy to use, easily deployable, secure, reliable, and low cost with the aim of reducing the cost of care while improving the independence, quality of life, and health of the elderly and those with disabilities.

SmartCare will design, integrate, and evaluate technologies to support:

Health Maintenance
- Nutrition
- Physical activity
- Social connectivity
- Toileting and bathing
- Rest and sleep

Safety
- Fall prevention

Health monitoring
- Chronic disease monitoring
