The American Society of Civil Engineer's Fort Worth Branch announced that Sam Hinojosa is the recipient of Edmund Friedman Young Engineer of the Year Award.

An interview for a school project with Don Jennings, P.E., an engineer for the city of Lubbock, set Hinojosa on the path toward a career in civil engineering.

In college, he was an active member of ASCE, Chi Epsilon, and Tau Beta Pi.

Upon graduating from Texas Tech in December 2003, Hinojosa accepted a position with Halff Associates, Inc. in Fort Worth.

Hinojosa has had the opportunity to work on a variety of projects related to stormwater and floodplain management in various cities, including Fort Worth, Grand Prairie, Mansfield, Richland Hills and Austin. His projects have ranged from design to fully dynamic two-dimensional modeling of stormwater and riverine systems.

He is currently employed by Halff as a Project Engineer.

In 2008, he graduated from the University of Texas at Arlington with a masters of engineering in civil engineering with an emphasis in water resources. Hinojosa has been an active member of ASCE since 2004.

Currently, Hinojosa is the vice-president/secretary of the Fort Worth Branch. He has served as meeting-setup, membership chair and treasurer.

Hinojosa is married to Christina and has a one-year old daughter. He and his wife enjoy serving at Calvary Church of Irving.
