Oncor COO Announces Retirement

Jenkins’ 40-Year Career Included Many Highlights

DALLAS--(BUSINESS WIRE)--Charles Jenkins, Oncor Chief Operating Officer, announced today he is retiring after 40 years with the company. Jenkins will continue to work for the company in a transition role until April 1, 2012. The company expects to name a new COO in the near future.

“Charles has been an invaluable part of our leadership team and is well respected both internally and across the industry,” said Bob Shapard, Oncor Chairman and CEO. “Through his leadership, we have undertaken the largest and most significant investment programs in our history, including technology upgrades and the Competitive Renewable Energy Zone transmission line project. His leadership is one reason why Oncor has constructed more transmission lines in the CREZ project than any other company in the state.”

Jenkins joined the company in 1971 as a co-op engineering student for Dallas Power & Light. After graduating from the University of Texas at Arlington, he was hired on as a full-time employee. Since his start with the company, Jenkins has held a variety of engineering, management and officer positions, exposing him to a broad view of the electricity industry. After working for the other former TXU companies, he came back to Oncor in 2003 to head Transmission Grid Management. In November 2009, he took his current position.

Jenkins is a registered professional engineer in Texas. Over his career he has contributed to many industry organizations including serving as a director on the Electric Reliability Council of Texas board, a director of the Association of Edison Illuminating Companies board, a member of the North American Reliability Corporation operating and planning committees, a member of the North American Transmission Forum steering committee, chair of Edison Electric Institute transmission committee, a member of the Electric Power Research Institute power delivery executive advisory committee, and a member of the industry leadership council for the Consortium for Electric Reliability Technology Solutions. His civic activities include being an adult leader with Boy Scouts of America and serving as a director on the YMCA of Metropolitan Dallas board.

Oncor Electric Delivery Company LLC (“Oncor”) is a regulated electricity distribution and transmission business that uses superior asset management skills to provide reliable electricity delivery to consumers. Oncor operates the largest distribution and transmission system in Texas, delivering power to more than 3 million homes and businesses and operating approximately 118,000 miles of transmission and distribution lines in Texas. While Oncor is owned by a limited number of investors (including majority owner, Energy Future Holdings Corp.), Oncor is managed by its Board of Directors, which is comprised of a majority of independent directors.
