The Planetarium will be
Closed for Thanksgiving

The Planetarium will be closed from Thursday, November 26th through Friday, November 27th in celebration of

Thanksgiving.

We will re-open for all regular public shows on Saturday, November 28th. Please see our [website](#) for a complete

New Holiday Show Coming in December!

Holiday Music Magic

Get in the holiday spirit this December with our new show, Holiday Music Magic.

This music entertainment show features a variety of holiday songs from Mannheim Steamroller and Burl Ives to Brenda Lee and Kurt Bestor. The soundtrack is visually choreographed with 3-D artistic animation, real-time performance elements, and all-dome scenery. The program is a fun and entertaining experience for general audiences, particularly families.

Look for the schedule in next month's Starry Messenger!

Astronomy Day:

Huge Success!

The Planetarium would like to thank the Texas Astronomical Society and the National Space Society of North Texas for helping us host Astronomy Day this October. The event was a huge success with more than 1500 people visiting throughout the day. Thanks also to Calabrio's, the Science Ambassadors and the Society of Physics Students for all your help and contributions!

schedule of shows.

We apologize for any inconvenience this may cause.

Doomsday 2012:

Could it be real?

A new movie, **2012**, will be in theatres on November 13. The movie is about the recent Doomsday in 2012 hoax. This hoax actually has been around for a few years.

The top theory related with 2012 is discussed below:

- Mayan Calendar ends in December 21, 2012.

The Mayan Calendar is a cyclic calendar that consists of sets of numbers. In the Mayan calendar, December 21, 2012 (in Gregorian calendar) is represented by 13.0.0.0.0, which is a new millennium, rather than the end of the calendar. You will probably remember similar hoaxes when we entered in a new millennium almost 10 years ago.

Although safety of the Earth is not guaranteed, the above hoax is not realistic and doesn't carry any scientific evidence. To read more theories about the destruction of Earth in 2012, please see the [article](#) on our website.

If you missed all the fun, watch the Starry Messenger in the coming months as we begin planning another Astronomy Day for the spring.

New Show this spring:

Violent Universe

This spring, the Planetarium will begin playing the newest show from producer Evans and Sutherland,

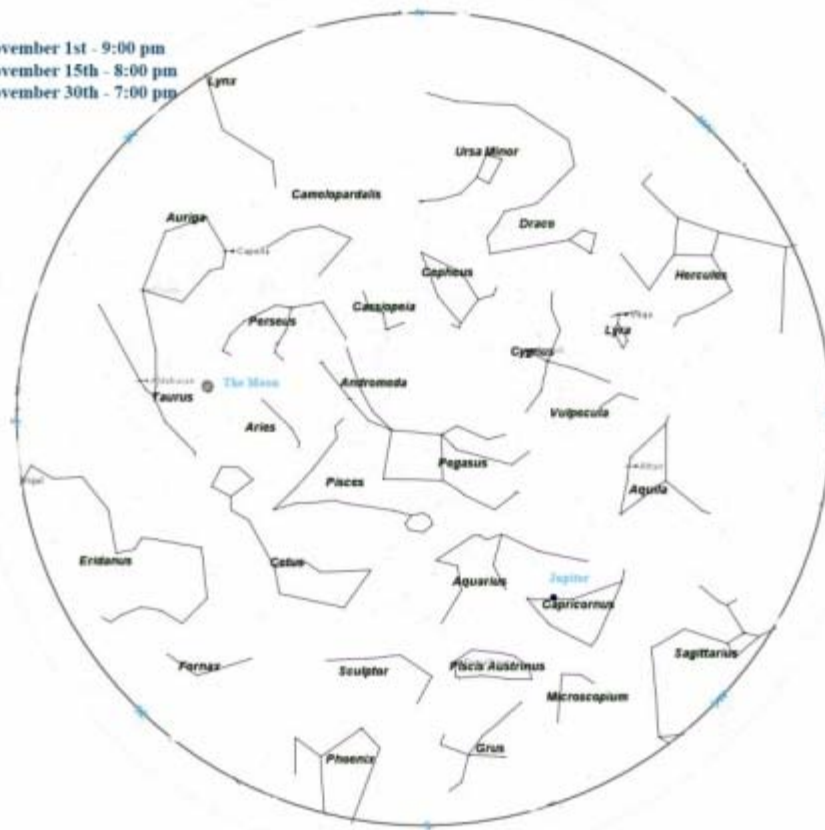

Violent Universe.

The beauty of a starlit sky conceals the violent forces at work within our universe. From the upheaval of a giant star that explodes to release its material into space, to a future encounter between the Earth and a large asteroid that is too close for comfort, we will witness the forces that hold the universe together and occasionally try to rip it apart.

Comets, asteroids, and meteors hurtling through space. Stars collapsing under their own gravity. Infernos of nuclear energy releasing their deadly radiation across the universe. Witness the raw power of the cosmos in this thrilling show that gives you a front-row seat to watch as worlds collide! Narrated by Patrick Stewart.

Look for it this spring!

November 1st - 9:00 pm
November 15th - 8:00 pm
November 30th - 7:00 pm
