\$2 Movie Schedule

October

The Planetarium is kicking off our fall \$2 Movie schedule with some great new titles. Make sure to visit the Planetarium every week, so you don't miss out on your favorite movies. Every seat is just \$2!

Introducing Spacepark 360!

Our Newest Planetarium Show

The long wait is over! Spacepark 360 is now showing during our public schedule this Fall.

Spacepark 360, a thrilling and immersive new show, takes audiences through an amusement park in space!

Rides are found all over the solar system and include flips, turns and out-of-this-world experiences!

No longer will you have to wait in long lines or pay expensive admission fees to enjoy roller coasters. Our roller coaster rides are in the air conditioned comfort of the Planetarium. Sit back in our reclining seats and get swept through the exotic destinations.

All 9 amusement park rides are based off of real rides throughout the world. To read about the rides or the entire Spacepark 360 project visit their [website](#).

Galileoscopes Are Now Available!

Purchase Yours Today

Build your own telescope with the Galileoscope kit! The Galileoscope™ is a high-quality, low-cost telescope kit developed for IYA 2009 by a team of leading astronomers, optical engineers, and science educators.

No matter where you live, with this easy-

September 29, October 1, 2 - Prince of Persia: The Sands of Time

October 6, 8, 9 - Robin Hood

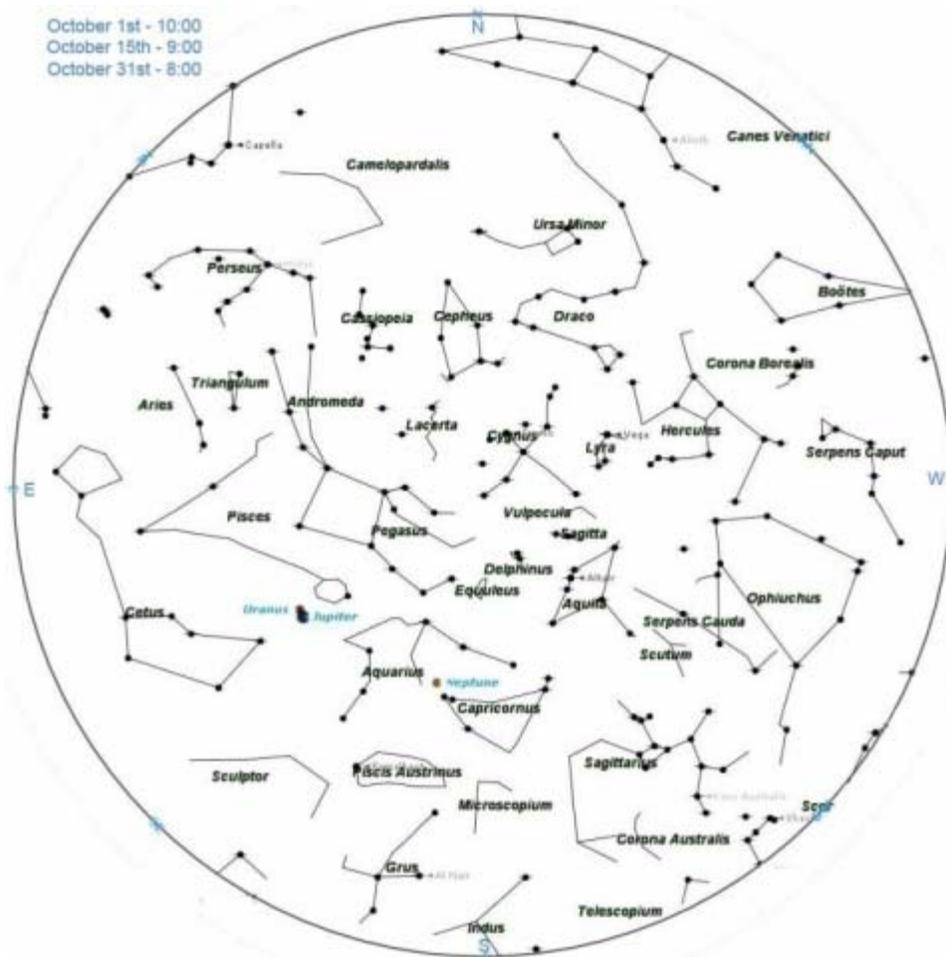

October 13, 15, 16 - Iron Man 2

October 20, 22, 23 - Karate Kid

More great movies are coming in November, so keep your eyes on our [schedule](#).

to-assemble, 50-mm (2-inch) diameter, 25- to 50-power achromatic refractor, you can see the celestial wonders that Galileo Galilei first glimpsed 400 years ago; including lunar craters and mountains, four moons circling Jupiter, the phases of Venus, Saturn's rings, and countless stars invisible to the unaided eye.

Purchase yours today for just \$40; limited quantity available. Orders can be made by phone 817.272.1183, [email](#) or in person at any public show. Payment must be made in advance to hold a telescope for future pick-up.
