Remarks:

Whereas: Many students are forced to lug heavy equipment and supplies across UTA’s campus,

Whereas: Some buildings provide lockers for students to store their supplies until they are needed to limit physical strain and promote general health,

Whereas: Not enough buildings provide lockers to suit student needs,

Be It Therefore Resolved That: More buildings (specifically the University Hall and the business building) provide lockers for student's personal use, so they are not forced to haul heavy supplies over long distances, thereby limiting fatigue and physical strain.
